EXECUTIVE SECRETARIAT

Dear Dr. Henney,

I'm writing to urge you to support the CSP1 petition against sub-therapeutic uses of antibiotics in livestock.

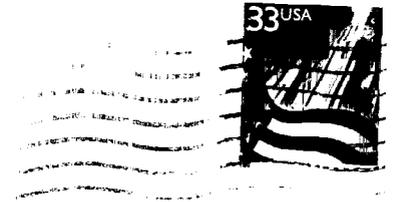

I'm a mother of four young girls and I'm concerned about the potential for resistance their growing bodies are exposed to through eating meats + other products. With the growing threat of "superbugs" I would think we would find ways to reduce our reliance on antibiotics. While I as an individual often choose to buy organic it does not protect me in the long run if I contract a disease that is no longer treatable with conventional antibiotics.

99P 0485

Please use your position as America's gatekeeper to a safe food supply + oppose antibiotics + hormones in animal feed! Thank

C2106
